**Eligible Retrofits:**

- Install a pressure reducer valve on the irrigation system.
- Conversion of spray or rotor zone to high-efficiency nozzles—converting an existing turf area watered by traditional, pop-up spray heads to multi-stream, rotating heads.
- Conversion of a spray zone to micro drip—converting areas such as a plant bed, a parkway strip (area between sidewalk and street), a parking lot island or turf area that is currently irrigated by pop-up heads into a micro drip zone. Drip zones must have appropriate pressure regulation and a filter.
- Capping a zone—the removal and capping of an existing irrigation zone. This may occur because the area has been converted to hardscape, or plants are mature and do not require supplemental irrigation.
- Replace a traditional controller with a SWAT (Smart) Controller on the system.
- Audit performed by certified Qualified Water Efficient Landscaper (QWEL) or Certified Landscape Irrigation Auditor (CLIA) or WaterSense Landscape Professional.
